For more information about how you can  
create your own social network, visit our website:

**Discover.Freedica.org**

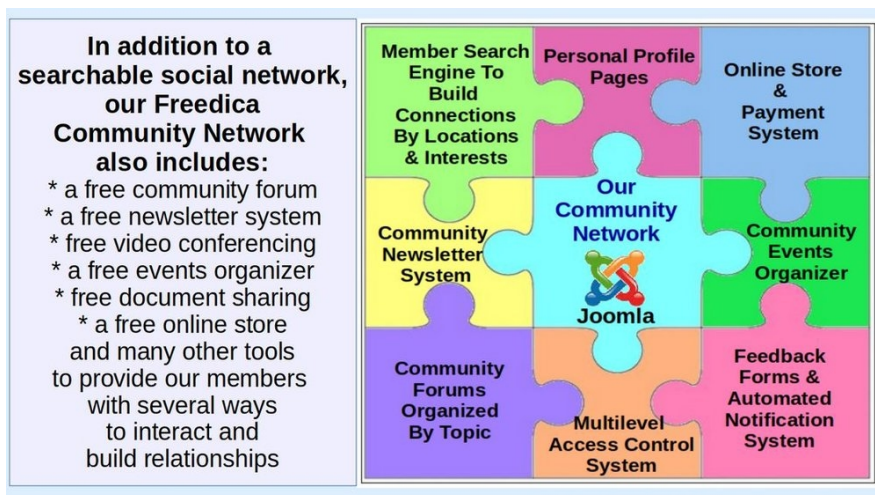

Freedica is a free social network that allows you to easily create your own locally controlled social network - similar to Facebook or Twitter – but under the control of your local group rather than under the control of a billionaire led for-profit corporation - and without the data mining, shadow banning, trolls and bots commonly found on top down social networks.

## Freedica offers many important community organizing benefits including:

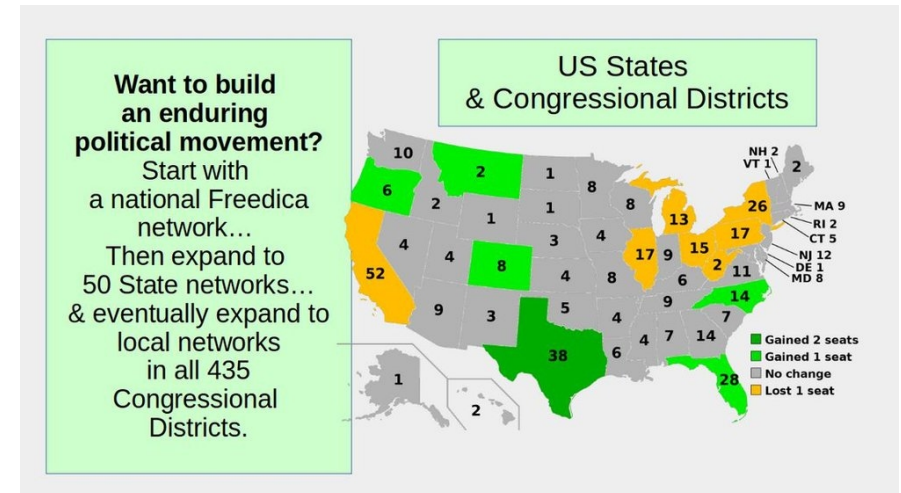

- \* **Member Search tool & Topic Search tool** to help members with common interests find each other.
- \* **Customizable profile forms** to organize by state, county, city, Congressional District, Legislative District and or School District.
- \* **Customizable Themes** to give you complete control over the appearance of your network pages.
- \* **Customizable New Member Landing page** for members to be directed to rather than just returning them to the Network Home page.
- \* **Easy to read tips for both admins and community members** explaining how to use and manage your Freedica local social network.

Freedica is a better way to share information and empower your local community!

- \***Friendlier Friends...**
- \***More Freedom!**
- \***Create Groups...**
- \***Share Events**

Join our network OR let us help you built your own!

Freedom of expression, access to information, and privacy are fundamental human rights that should be respected on the Internet as well as in real life.

Just as the key to political freedom is local control of government, the key to freedom of speech is local control of your own social network.

**We have written a detailed course on how to create your own secure Freedica social Network.** Here is a link to this course:
